PROJECTS

1. **Tourism and Hospitality Management**

   – *MERN FULL STACK DEVELOPMENT*

   Our Tourism and Hospitality Management project facilitates seamless booking experiences for travelers, streamlining hotel reservations and itinerary planning. With an intuitive interface and robust backend powered by Mongoose, Express JS, and Node JS, we ensure efficient management of travel accommodations.

2. **Movie TV Show Recommendation System**

   – *PYTHON FULL STACK DEVELOPMENT*

   Our Movie and TV Show Recommendation System empowers users to seamlessly access information on specific movies, create personalized watchlists, and enjoy a smooth user experience. Offering a curated selection of content, our system enhances entertainment discovery, making it easy for users to find their favorite movies and TV shows.
